

# EFFORTLESS POWER

All-new Continental is effortlessly powerful, designed and engineered to make every action as easy as possible for the driver and passengers.

- Simply pressing a button on the door handle activates the new microprocessor-controlled E-latch electronic door handle, releasing the door for easy entry, while the available auto-cinch feature secures the door latch when gently closed

- Push-button start brings the available Lincoln-exclusive 3.0-liter GTDI V6 engine to life, offering a projected 400 horsepower and 400 lb.-ft. of torque<sup>1</sup> for easy and smooth acceleration
- When equipped with the 3.0-liter GTDI V6 engine, the Dynamic Torque Vectoring system automatically adjusts torque between the left and right wheels on the rear axle of the all-wheel-drive system to aid cornering and provide confident handling and stability – especially in tight turns
- Lincoln Drive Control allows the driver to choose among three suspension settings, normal, comfort and sport. Advanced sensors in the continuously controlled damping system monitor the road 23,000 times per second and automatically adjust to provide a smooth and comfortable ride
- Auto Hold keeps the vehicle at a complete stop without having to hold your foot on the brake; this helps make driving a bit easier in heavy stop and go traffic

Driver-assist features help you stay in control:

- Available Lane-Keeping System alerts the driver if the vehicle is drifting from the driving lane, and actively applies steering torque to help direct the vehicle back into the lane<sup>2</sup>
- Available adaptive cruise control with stop-and-go functionality automatically can slow the new Continental, resuming higher speeds when traffic clears and activating the brakes automatically to bring it to a complete stop if the driver fails to apply brakes in time<sup>2</sup>
- Available 360-degree camera helps make maneuvering in tight places easy, as the center display provides a seamless overhead view of the vehicle generated from four cameras mounted at the front, rear and under the sideview mirrors
- SYNC 3<sup>®</sup> allows you to make calls, manage music selection and read texts in the center display while keeping your hands on the wheel<sup>3</sup>

<sup>1</sup>Tested on 93-octane fuel. <sup>2</sup>Driver-assist features are supplemental and do not replace the driver's judgment and need to control the vehicle.

<sup>3</sup>Driving while distracted can result in loss of vehicle control. Only use SYNC systems/other devices, even with voice commands, when it is safe to do so. Some features may be locked out while the vehicle is in gear. Not all features are compatible with all phones. Message and data rates may apply. Optional Navigation System map updates cannot be received via Wi-fi<sup>®</sup> and require a separate update.
